SUMMARY OF INFORMATION

In response to Hussein's threat of surprises, I saw black with light and fire. The fire is near water. As a result of military action, the Joint Chiefs of Staff engage for long term control.

With regard to terrorism, Britain is targeted for attack in a city area due to the war. There is a field (track) with a white fence, green background, and a man on horseback in an english riding habit. Nuclear facilities in the U.S. are targets. Ventilation is an issue.

Bombs are engaged or released upward with levers and Hussein's surprise is longitudinal in nature. His action is to kill power and to lower the boom leaving destruction. He has low intensity small bombs and guns are utilized.

No chemical weapons will be used in the United States.
